Our passion is to promote joy, learning, inspiration, and socialization through unique aquatic play experiences. Our design team collaborates with architects, landscape architects, aquatic consultants, artists, and end users around the world to develop innovative aquatic play environments and equipment.

BACKED BY A WORLD CLASS COMPANY

PLAYCORE®

Building **communities** *through* **play** & **recreation**™

PlayCore helps build stronger communities around the world by advancing play and recreation through research, programs, and partnerships. We infuse this learning into our complete family of brands.

We combine best in class planning and education programs with the most comprehensive array of recreation products available to create solutions that match the unique needs of each community we serve. To learn more, log on to www.playcore.com

CREATE WITH AQUATIC PLAY

Limited only by the creative imagination, Water Odyssey is dedicated to keeping youthful hearts entertained by providing the creative depth your aquatic playground needs.

- Fountain People, makers of Water Odyssey, is a leading designer and manufacturer of aquatic play solutions for spray parks and aquatic facilities.
- With over 30 years of proven performance, Fountain People is a world leader in the manufacturing of modular pumping and water treatment systems designed specifically for water features and aquatic play.
- Water Odyssey specializes in creating unique project-specific products from interactive games to highly themed spray features.
- From architectural to themed spray features, Water Odyssey has the largest offering of interchangeable products available.
- Water Odyssey's Aqua Armor™ is the most durable coating system for the aquatic play industry.
- As an industry leader, Water Odyssey brings cutting edge technology to the design of aquatic play areas and provides the highest quality aquatic play equipment available.
- Water Odyssey products are installed in commercial and municipal facilities all over the world. All Water Odyssey products are made in the USA and fabricated at our facilities in San Marcos, TX.

INTRODUCTION

What is a Spray Park?

A spray park, also known as a splash park or splash pad, is a recreational area designed specifically for interactive water play. Unlike swimming or wading pools, spray parks are designed to have no standing water thus reducing the risk of drowning. These areas improve public spaces and provide an ideal setting for family recreation.

A community considering the addition of a recreational facility should consider an aquatic playground. Children have a natural affinity for water and Water Odyssey can provide them with a wholesome interactive aquatic play environment.

What is a Zero Entry Pool?

A zero entry pool is a recreational area in an aquatic center or water park that is designed specifically for interactive water play at a depth of 2 or more inches of water. These areas are commonly known as wading pools & beach-entry pools, and typically require lifeguards. Water Odyssey provides ideal solutions for these play environments.

Spray Parks:

- cost less to install than a swimming or wading pool.
- cost less to maintain than a swimming or wading pool.
- are safer since there is no standing water.
- do not require Lifeguards.
- are an ideal community recreational attraction.
- stimulate children's senses through interactive aquatic play.
- are programmable to enhance the play experience.

Zero Entry Pool:

- can include multilevel aquatic play structures for added play value.
- can utilize water from the pool's pumping system for spray features.
- stimulate children's senses through interactive aquatic play.
- can generate revenue through ticket sales.

"We don't stop playing because we grow old; we grow old because we stop playing."

– George Bernard Shaw

family company, we know how important safety is when it comes to children. That's why Water Odyssey spray features & systems are designed and manufactured in accordance with ASTM standards F2461-09 and F1487-11.

SIGNATURE BENEFITS
OF WATER ODYSSEY

SWITCHEROO™ ANCHORBASE SYSTEM

- The originator of the flange-mounted anchor base system for maximum interchangeability
- Ideal for sensitive budgets and future expansions

STAINLESS STEEL MANIFOLDS AND BRASS VALVES

- High quality 304 stainless steel manifolds and brass valves come standard.
- Extends the life of the water management system
- Reduces maintenance
- Stands up to extreme climates

BRASS AND STAINLESS STEEL NOZZLES

- Precision machined for the ideal water effect
- Durable and resistant to rust
- Tamper-resistant
- Easy to maintain

LOW-PROFILE FLANGES ARE EASY ON THE FEET

- All flanges are low-profile with rounded edges
- Rounded button-head hardware
- Reduces the risk of stubbed toes

WATER MANAGEMENT SYSTEMS FOR EASY INSTALLATION

- Pre-designed and pre-wired
- UL Listed control systems for safety
- Factory programmed for easy start-up
- Field programmable for future adjustments

ROTATIONAL JOINTS

- Free of pinch points for safety
- Stainless steel and Delrin® construction that is corrosion & chemical resistant
- 360° rotation with no mechanical stops that will break
- Integral flow control valve that is factory set and field adjustable to dictate the spray zones so water won't spray off the pad

AQUA ARMOR™ - SUPERIOR COATING SYSTEM

- Stands up to chemicals, UV, and active play
- Structural elastomeric coating that is vandal-resistant
- Easy to clean from calcium build-up

CUSTOM THEMING CAPABILITIES FOR A TRUELY UNIQUE LOOK

- Hand-crafted spray features from talented artists
- Designed & manufactured to meet your vision
- Theming allows you to enhance your brand and create an immersive experience

WATER ODYSSEY DESIGNS FOR SAFETY AND ADA COMPLIANCE.

- Key considerations are age-appropriate play areas, transition areas, traffic patterns, splash zones, play value, and overall aesthetic of the project.
- Products are designed & manufactured to be in accordance with ASTM safety standards and ADA accessibility for maximum participation of ground level spray features, activators and interactive equipment.

SUPERIOR DESIGN SUPPORT TO HELP YOU BUDGET, PLAN, AND BRING YOUR VISION TO LIFE

- We provide concept details, budget analysis and bid documentation including specifications, 3D renderings, plan views, piping diagrams & electrical drawings
- We can provide 3D animations of your project upon request
- We provide ongoing customer support for the life of the project.

SPRAY LONGER, PLAY LONGER

WITH ILLUMINATED WATER EFFECTS FOR SPRAY PARKS

Utilizing ColorCast™ accents & low voltage lighting, Glow Domes are a cost effective solution to illuminate your spray park at night with dazzling water effects & provide a colorful experience that extends the hours of play.

Variety of Effects | Color Changing | ETL Listed Low Voltage LED Solutions for Safety | Energy Efficient | ADA Compliant

URBAN DESIGNS

COLORCAST™

“It is a happy talent to know how to play."

– Ralph Waldo Emerson

A CANVAS OF COLORS, SHAPES, TEXTURES & LIGHT

Durability

ColorCast™ accents are made of a rigid urethane polymer and carefully handcrafted by our talented artists. These accents are semi-flexible to absorb impacts & increase longevity.

UV and Chlorine Resistant

Vivid colors are protected by UV inhibitors to reduce fading overtime. ColorCast™ has a natural resistance to chlorine, reducing the potential for degrading and brittleness.

Low flow features for water conservation

We understand that water conservation is a big deal. That’s why we provide a wide variety of options from spray features to water management solutions, so you can make every drop count.

Fun For Everyone

This contemporary product line is designed for people of all abilities to interact with the features. Whether twisting, spinning, or plugging streams of water, these spray features are sure to appeal to all.

The beauty of interchangeability

This colorful line is designed around our 4-inch anchor base, allowing for maximum interchangeability.

Translucent colors and shadow casting.

ColorCast accents are offered in a variety of colors that cast fun shadows on the deck surface as light passes through them. Overlapping accents creates an educational experience with color mixing.

URBAN DESIGNS

COLORCAST™

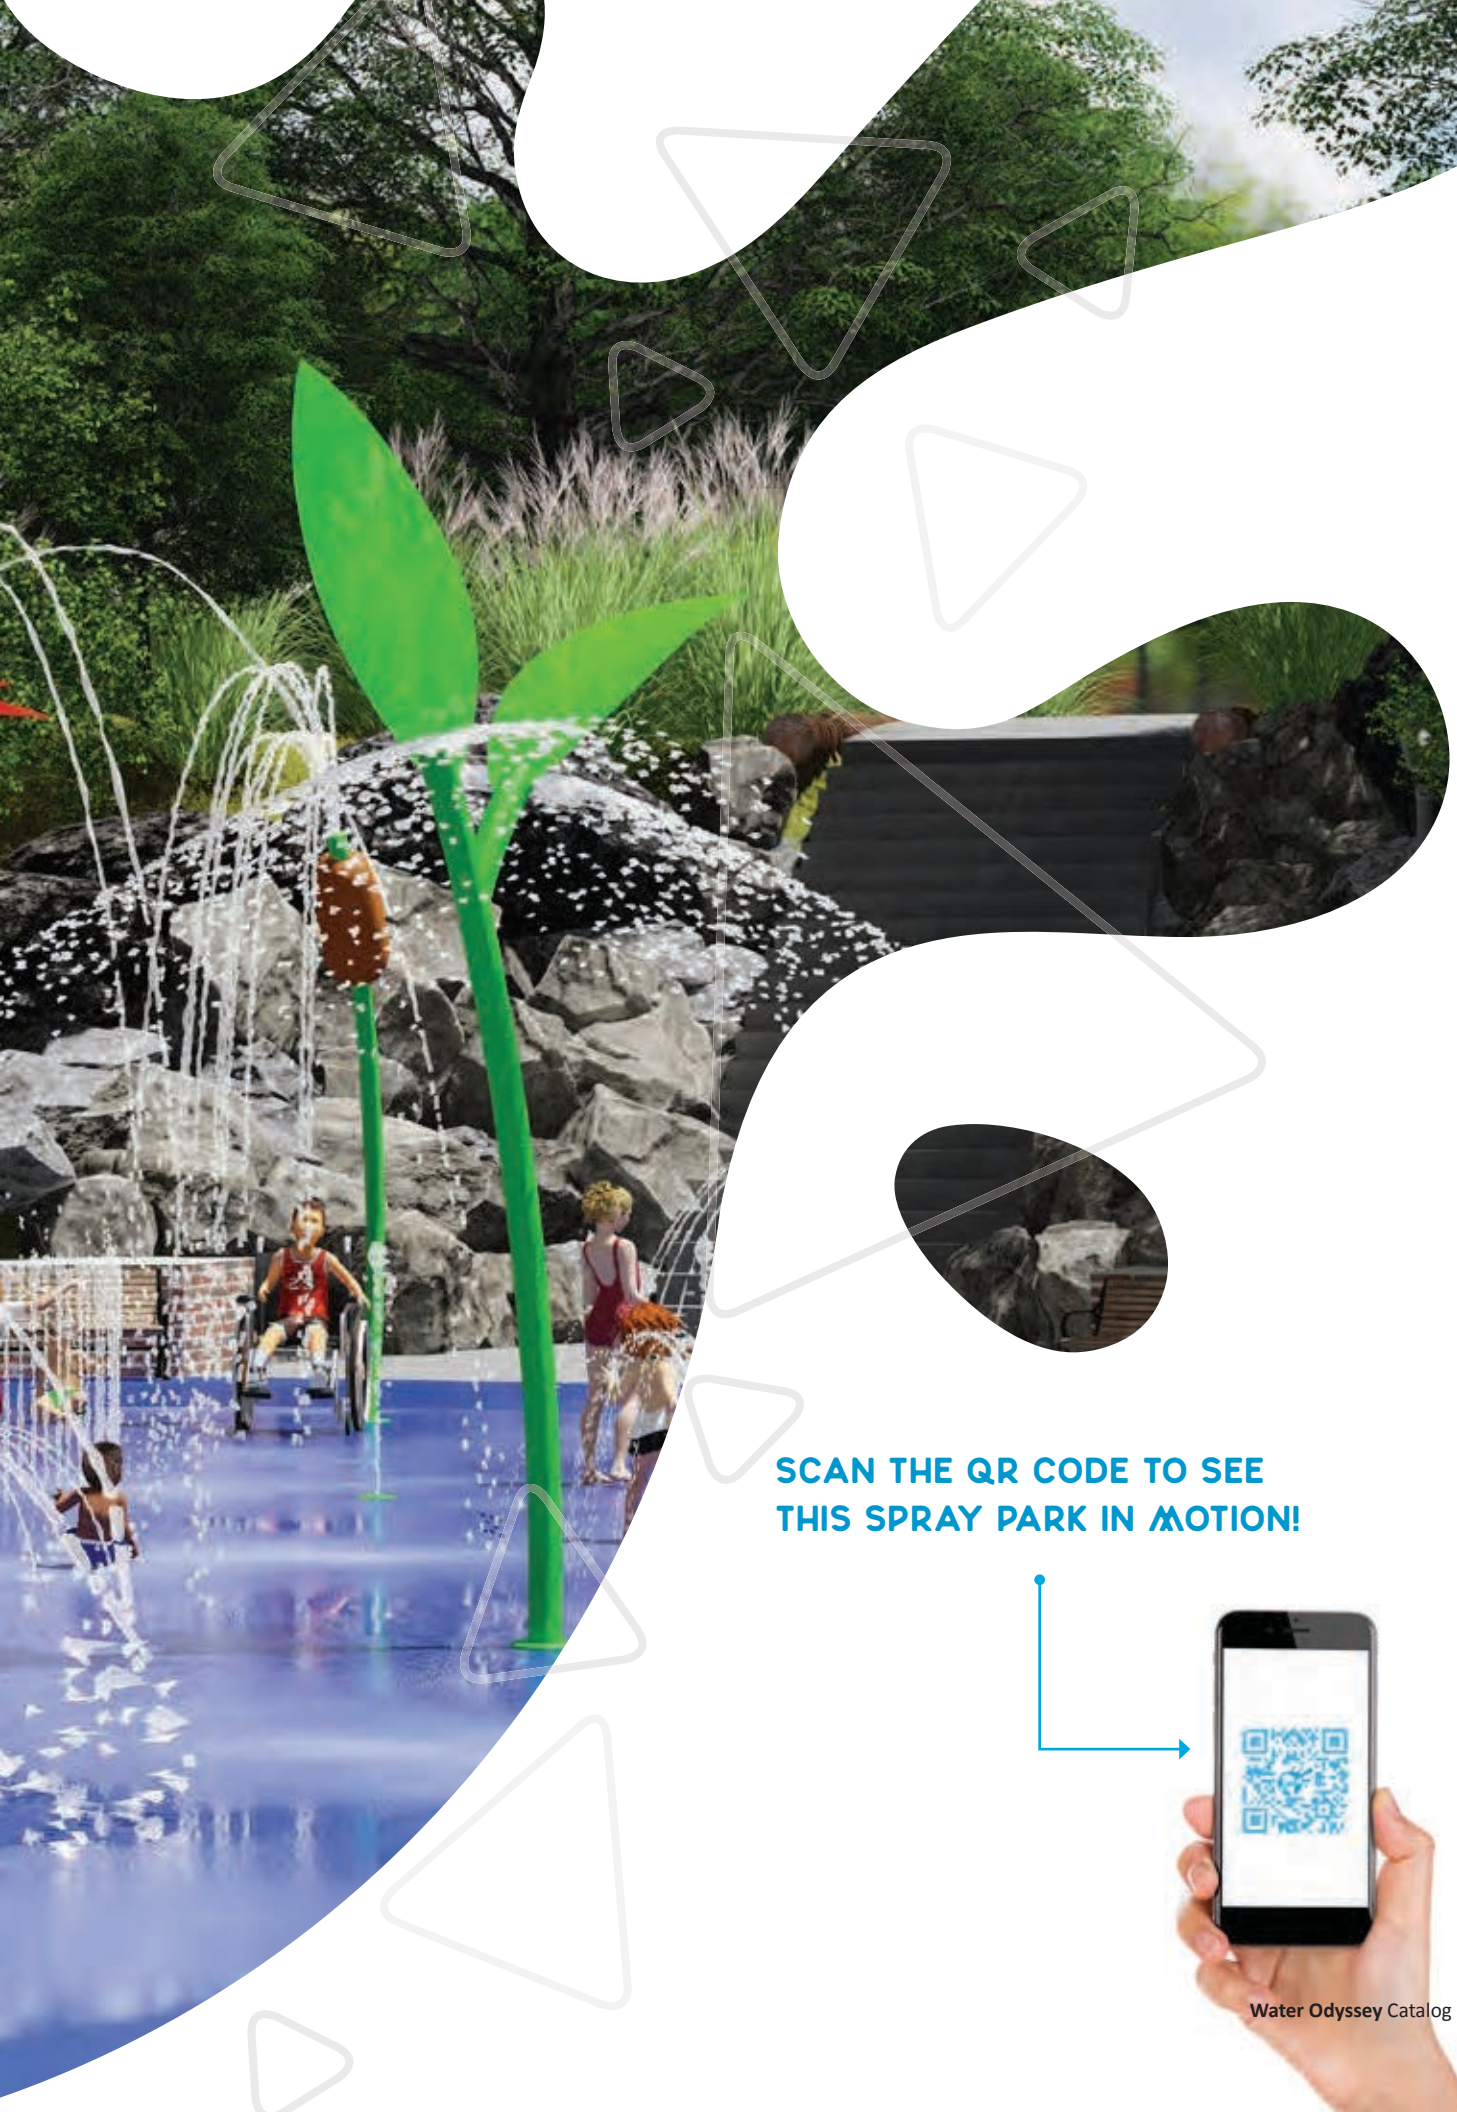

ColorCast™ accents allow light to pass through, creating colored shadows on the ground.

Gentle foam nozzles are standard with all shooters and sprayers for a soft aerated spray effect.

Multiple spray effects create layers of water, such as crawl tunnels and weaving ribbons of water.

THEMED ESSENTIALS

CREATE AN IMMERSIVE AQUATIC PLAY EXPERIENCE

IMAGINATION AT PLAY

Water Odyssey captures the essence of theming when it comes to aquatic play. It's an artistic combination of hand-detailed carving and painting that make these features come to life. With over 200 years of collective experience in custom fabrication for the aquatic industry, our artists lead the way in the creation of truly unique spray features that set Water Odyssey apart from the rest.

Unique features for unique facilities

Themed Essentials can be painted with logos, sponsor names, and other graphics. Vibrant colors, theming, and custom creations help set your facilities apart from the rest.

Durable & long-lasting

All Themed Essentials are made of 304L stainless steel with the addition of hand-crafted themed creations. These spray features are protected with UV & chemical resistant Aqua Armor™, the most durable coating system in the industry.

Interchangeable

Themed Essentials are Interchangeable by means of the Switcheroo™ anchor base system. Planning for the future. Start small with ground sprays, then upgrade to Themed Essentials to get the look you had planned for.

For custom themed products visit www.waterodyssey.com to find your local Water Odyssey representative, or contact us.

Recreational spaces allow for exciting opportunities to stimulate and enrich the senses for people of all abilities.

SPRAYERS

SPRAY FEATURES THAT TWIST & TURN ADD IMMENSE PLAY VALUE

IMAGINATION AT PLAY

From Gravity Cannons™ to themed Spin N' Sprays, Water Odyssey offers an extensive selection of high quality sprayers. Hand-detailed theming, and innovative features such as gravity controlled shut-offs & activators make spray features like these one-of-a-kind.

Spray safely

Water Odyssey Sprayers are free of pinch points and can rotate 360° with no mechanical stops that will break overtime. Sprayers also come standard with an integral foam nozzle that emits an aerated stream that is soft to the skin. Water conserving options are available.

Adjustable spray zones

Sprayers have a stainless steel integral flow control valve that is factory set and field adjustable to dictate the spray zones so water won't spray off the pad.

Interchangeability

All Shooters & Sprayers are interchangeable. Change from theme to theme, or update your spray park with the next great product from Water Odyssey. Contact your local representative for more information.

For custom products visit www.waterodyssey.com to find your local Water Odyssey representative, or contact us.

GRAVITY & G2 SERIES

The Gravity Series sprayers are built around our unique soft-feel foam nozzle and is available with 45 to 360 degree swing (operating range) in both planes - standard is 90° horizontal swing by 45° vertical swing. This unit is available with a hidden wireless activator for virtually instantaneous on/off operation. There are no pinch points.

Options: Water Conserving Nozzle, Wireless Activator.

FUN FORMS™

THEMED PLAY

HANDCRAFTED CREATIONS FOR THEMED AQUATIC PLAY

These playful spray features are designed to go anywhere and everywhere. Municipalities choose Fun Forms for their rigid durability and long-lasting color. Water parks choose them to enhance their visual brand to create an immersive experience for their patrons.

Unique features for unique facilities

Water Odyssey offers a wide range of unique spray features. Vibrant colors, theming, and custom creations help set your facilities apart from the rest.

Durable & long-lasting

Fun Forms are protected by Aqua Armor™, the strongest, most durable coating in the industry.

Interchangeable & great for retrofit

All Fun Forms are manufactured to be easy to install, and make retrofit projects a breeze.

Limitless possibilities

The Fun Forms line includes over 200 designs to choose from, or bring us your ideas and we can bring them to life!

Fun for all children – Toddlers to Tweens

Fun Forms are intentionally designed to inspire youthful imaginations with bright colors and caricatured features for a truly fun look.

Fun Forms Aqua Spouts™

Themed Play for the little ones!

Perfect for any aquatic play setting Aqua Spouts are designed to complete any theme. These low level features keep toddlers in mind with a variety of gentle water effects. There are over fifty brightly themed hand detailed standard designs to choose from.

Fun Forms Aqua Sprayers™

Themed Play at its Best!

Fun Forms Aqua Sprayers™ are perfect for any aquatic play setting. Designed to complete any theme, these sprayers appeal to ages 3 and up. Aqua Sprayers offer wide variety of water effects such as misters, fans, and streams. Combinations of effects add play value to these unique spray features . There are over seventy brightly themed hand detailed standard designs to choose from.

Fun Forms Aqua Slides™

Slide into action!

Fun Forms Aqua Slides are great additions to any aquatic play setting. Aqua Slides meet ASTM requirements and are offered in various sizes to fulfill the needs of different age groups: Ages 2-5 and 5-12. There are over forty brightly themed hand detailed standard designs to choose from.

Custom designs are available. Contact your local Water Odyssey representative for more information.

FUN FORMS
OCEAN THEME

HAND-CARVED CREATIONS COME TO LIFE WITH BRIGHT COLORS AND COOL SPRAY EFFECTS

Combine Fun Forms with nautical themed Essentials to create more play value with an array of spray effects.

Kids love to plug holes with their fingers and redirect the water, making it spray further from the other nozzles.

Fun Forms slides are aesthetically inviting to youngsters. Slides help them build confidence to take on new challenges.

Designing for Safer Aquatic Play

We care about the safety of our kids. That's why we design and manufacture our equipment to be compliant with ASTM. This means no entrapments, pinch points, and properly placed handholds for entry and exit points.

GROUND SPRAYS

INTERACTIVE & INTERCHANGEABLE

STIMULATE THE SENSES WITH A VARIETY WIDE OF SPRAY EFFECTS

SHAPING THE WAY WE PLAY WITH WATER

Ground Sprays, also known as flush mounts and deck sprays, are at the core of aquatic play. These features offer a wide variety of water effects typically seen in the fountain industry. Made from Stainless Steel and Brass, Flush Mount ground sprays are built to last. The top plates can be theme-painted to give your facilities a truly unique play experience.

Theme painting for a truly unique look

Water Odyssey can paint your ground sprays to match the rest of your theme to help your facilities stand apart from the rest.

Precision effects with long-lasting materials & finish

Precision-machined brass and stainless steel nozzles create quality effects, are easy to maintain, and last for years to come. Top plates are cast brass and available in a natural finish, or in Aqua Armor™ for a chlorine & UV resistant color finish.

Low flow features for water conservation

We understand that water conservation is a big deal. That's why we provide a wide variety of water conserving ground sprays, so you can make every drop count.

For custom nozzles, visit www.waterodyssey.com to find your local Water Odyssey representative, or contact us.

Let Water Odyssey be a part of your design team help to you create a magical space full of wonder and excitement.

MULTILEVEL PLAY STRUCTURES

COLORCAST HOVER PADS

MULTIPLE LEVELS, WATER EFFECTS, AND SLIDES COME TOGETHER FOR CONFIGURABLE FUN!

ADDING DIMENSION TO AQUATIC PLAY

ColorCast™ Hover Pads are multilevel aquatic play structures designed for toddler to teen. Enhanced with ColorCast accents, these modular designs offer a wide variety of play activities, interactive features, learning opportunities, and spray features. Experience aquatic play in a whole new way.

Ease of installation

Unique center post design makes for easier installation than traditional multilevel structures. With less posts to create visual obstructions, supervision becomes much easier.

Interchangeable center pieces and water effects

Center spray features and post features are interchangeable and can be configured to meet the needs of the space and maximize fun.

Enhanced with ColorCast

ColorCast creates interesting colored shadows on the ground as light passes through.

For configurations and pricing, visit www.waterodyssey.com to find your local Water Odyssey representative, or contact us.

COLORCAST HOVER PADS

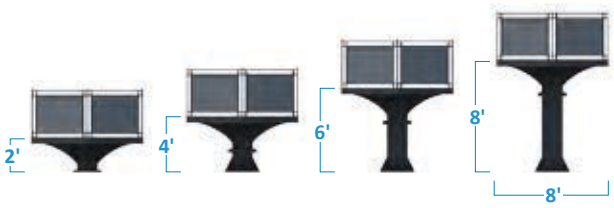

Tons of interactivity, modularity, and fun!

ColorCast™ Hover Pads are multilevel aquatic play structures designed for toddler to teen. Enhanced with ColorCast accents, these modular designs offer a wide variety of play activities, interactive features, learning opportunities, and spray features. Experience aquatic play in a whole new way.

Platform Dimensions

As the platforms get taller, the intended age group goes up. The standard platform heights are 2', 4', 6', and 8'. The hexagonal platform is 8 feet in width. This shape and size allows for versatility in features & configurations with ample room to play. Platforms can be positioned for multiple configurations. Open, closed, straight, curved, and loop slides are available. Platform transitions include stairs and bridges. Netting is available upon request. Contact us for general questions and custom configurations.

Activity Panels

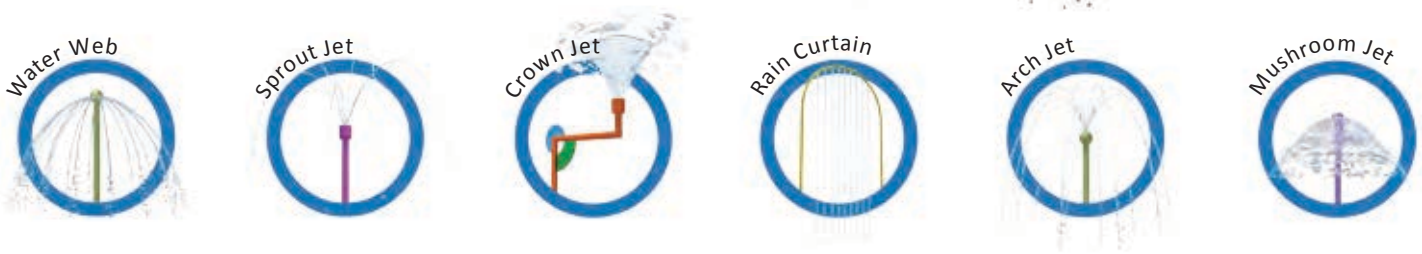

These panels can take the place of ColorCast panels for added play value. They incorporate activities such as turning cogs, and color mixing that encourage learning and motor skills development.

Perimeter Activities

These spray feature options add play value by providing a variety of water effects. Some can be turned for added interactivity. Post features are interchangeable, and can be configured to meet the needs of the space and maximize fun. More perimeter activities are available. Contact us for details.

MLPS-1
COLORCAST HOVER PAD

This Single-level Play Structure is designed for the youngsters. It features one level of play, two slides, multiple interactive spray features that turn, dumping buckets, and ColorCast accents. A Spin Flower adds to the platform as an interactive centerpiece. Optional activity panels can be incorporated to promote cognitive learning and motor skills.

250 GPM MAX/946 LPM

LEVELS: 1

MLPS-2
COLORCAST HOVER PAD

This Multilevel Play Structure features two levels of play platforms, three slides, perimeter play activities and multiple interactive spray features that turn, dumping buckets, and ColorCast accents. A Spin Flower adds to the upper platform as an interactive centerpiece.

500 GPM MAX/1893 LPM

LEVELS: 2

ColorCast Hover Pads are modular, scalable, and can create a lot of play value in a relatively small footprint.

THIS SPRAY PARK IN MOTION!

Landa Park

This custom nature-inspired tree structure is complete with a slide, dumping buckets, and water sprays.

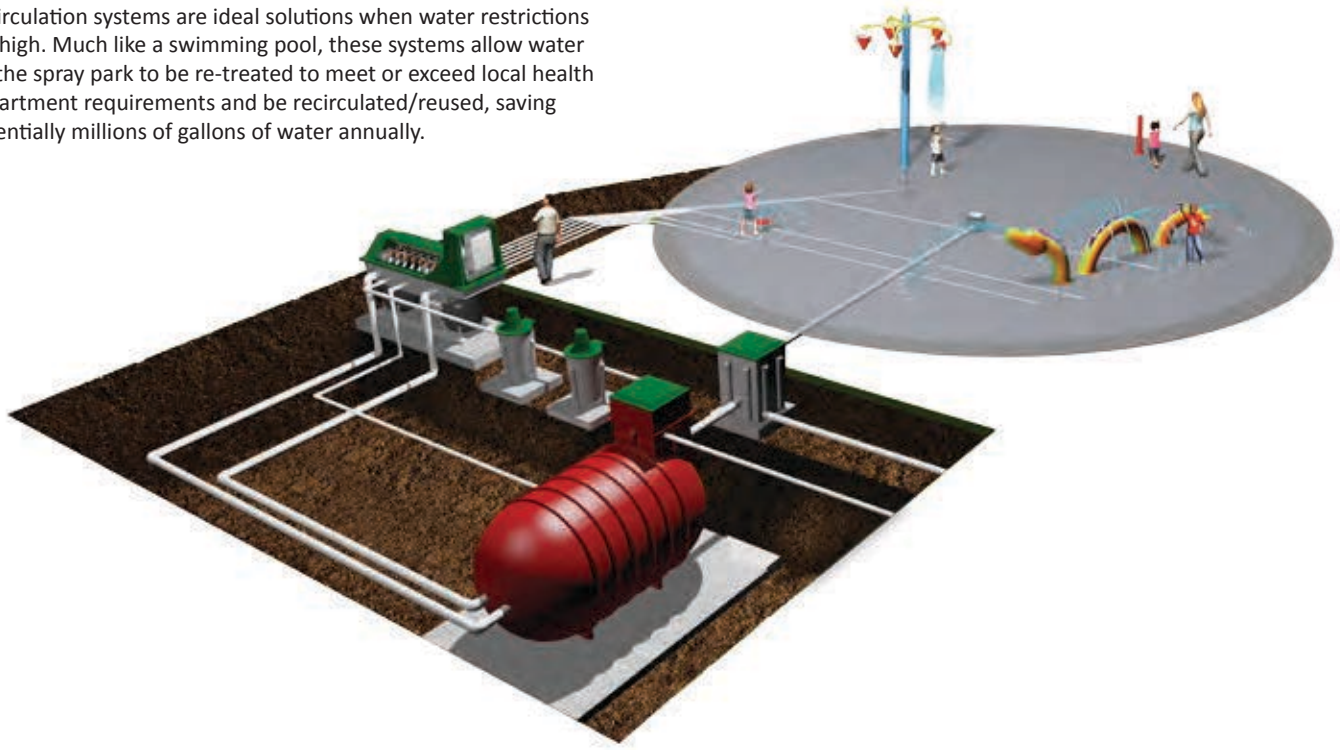

Fort Worth Zoo

People flock to the zoo just to play in the water park. This Safari themed multi-level slide structure has slides at each level, animals that spray water, and tidal tank that dumps a massive splash of water for fun-filled aquatic play experience.

Typical Recirculation Scenario

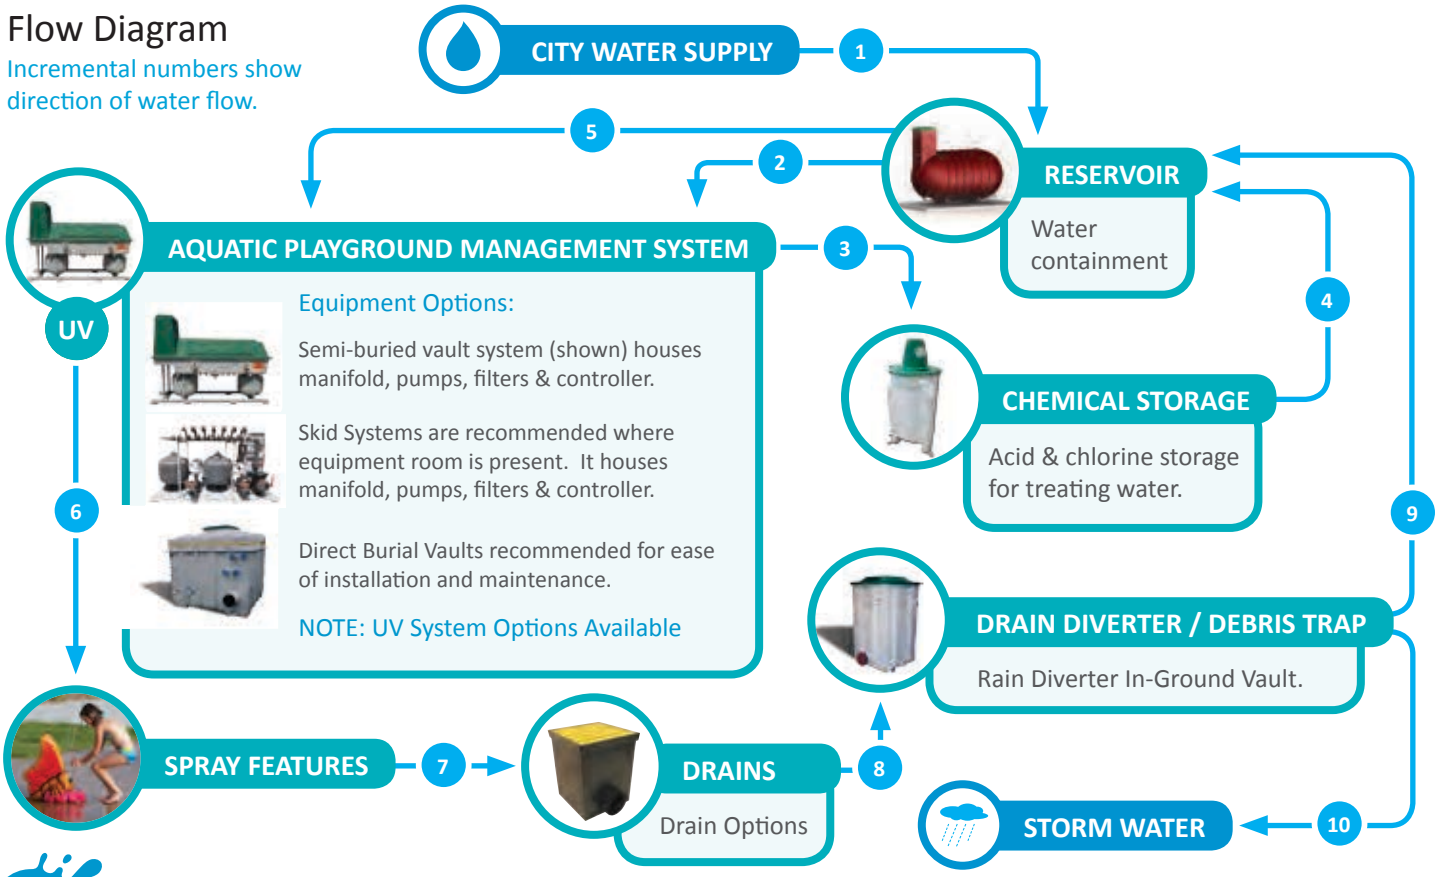

Recirculation systems are ideal solutions when water restrictions are high. Much like a swimming pool, these systems allow water for the spray park to be re-treated to meet or exceed local health department requirements and be recirculated/reused, saving potentially millions of gallons of water annually.

HOW IT WORKS

Flow Diagram

Incremental numbers show direction of water flow.

See more at **waterodyssey.com**

Equipment Skid

Skid systems have been designed for projects which have an equipment room. These systems are designed to accommodate projects of all sizes. They include pumps, filters, valves, manifold, controller, motor starters, and ORP/pH chemical controller. Available in both Single Loop 100% Filtration and Double Loop Continual Filtration models. Skids are fully assembled and pre-tested at the factory prior to shipment and are U.L. Listed as an assembly.

Semi-Buried Equipment Vaults

Designed for projects which do not have an equipment room, self-contained systems include pumps, filters, valves, manifold, controller, motor starters, and ORP/pH chemical controller. Available in both 100% filtered and articulated models. Units are fully assembled and pre-tested at the factory prior to shipment and the internal control system is UL Listed.

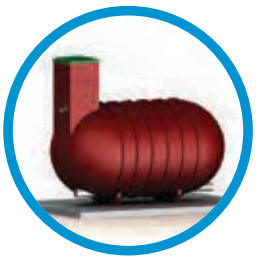

Self-Contained Vaults

Direct burial vaults are perfect for small to medium projects. These systems pass all of the return water through the filters as opposed to articulated systems which have separate pumps for filtration and play component operation. All direct burial systems are pre-assembled and pre-tested at the factory prior to shipment. Internal control system is UL Listed.

Chemical Storage & Metering Systems

Chemical Systems are designed specifically for aquatic playground use. These are complete pre-plumbed and pre-wired liquid chemical storage and metering systems that are suitable for indoor or outdoor installation. These units may also be installed either above-grade or below depending on the needs of the project.

Reservoirs

Reservoirs are designed specifically for water fearures and spray parks. They are constructed of rustproof, long-lasting FRP (fiber reinforced plastic) with integral ribs for added strength. These units are manufactured with resin conforming to NSF 61 requirements for potable water tanks and to applicable requirements of Underwriters Laboratories 1316. Basic units include a fiberglass ladder, a mechanical fill valve and all connections required for the specific project design.

Drains

The Water Odyssey Plain Drain and Maintenance Minimizer are cost-effective and ease maintenance. They feature a formed polyethylene sump, a molded polyurethane strainer basket, and a heavy-duty, ADA compliant grate with two quarter turn captive lock screws for quick maintenance. The Maintenance Minimizer also features a rain diverter service & winterization connection and is rated fro 125 GPM, cycling 4 times the amount of water as a Plain Drain.

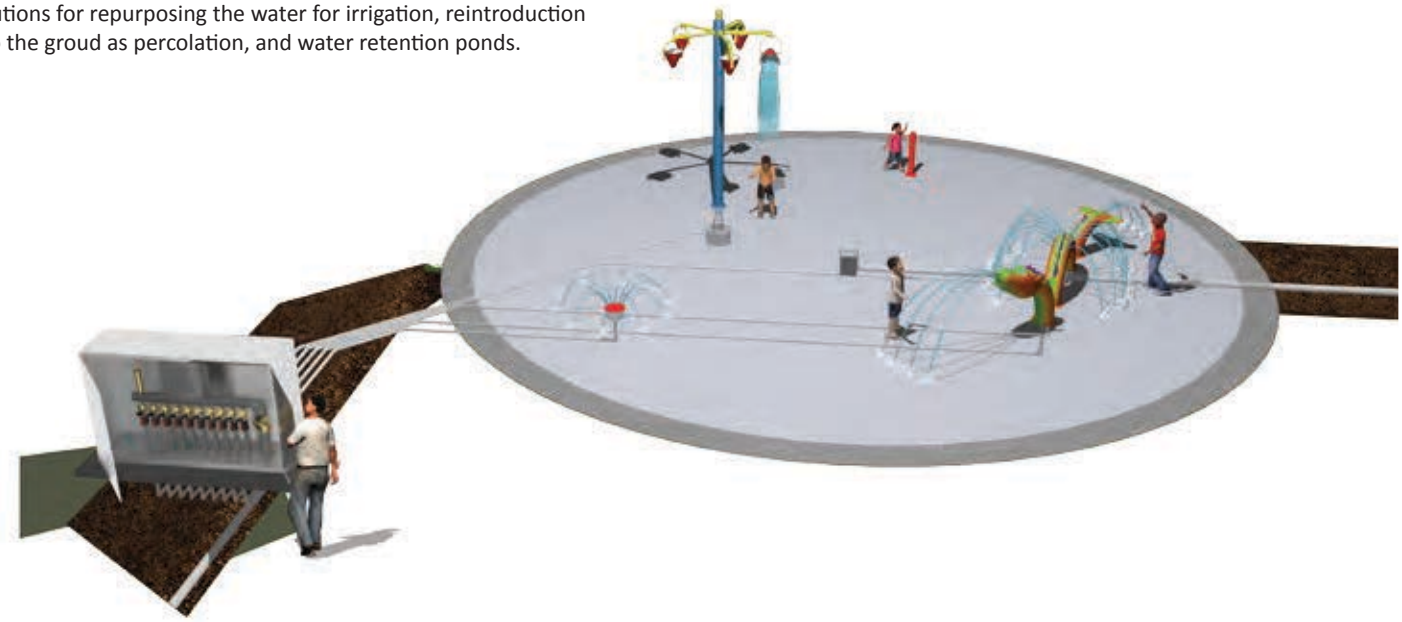

Rain Diverter System

For situations where heavy rain conditions are common, this "off-pad" solution is ideal for diverting stormwater from the pad during non-operating hours. Rain diverters return water from the recirculation system to the reservoir during operating hours.

NOTE: Equipment may vary from project to project based on the needs of the design.

Typical Flow-Through Scenario

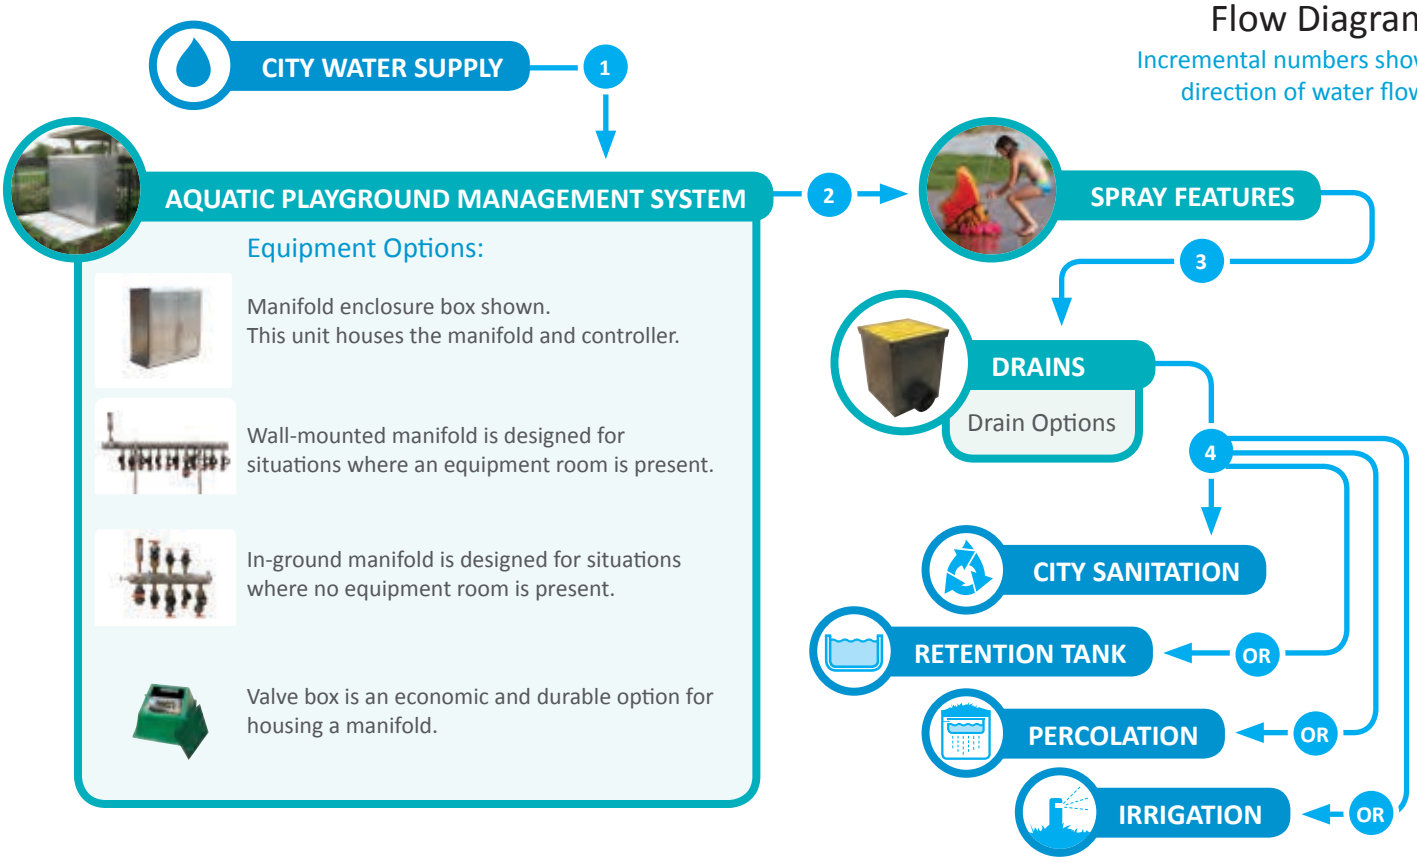

Flow-through systems, also know as potable & single-pass systems, are a cost effective solution when water restrictions are lenient. These systems are common for smaller projects that use less than 100 gallons per minute. This also makes them ideal solutions for repurposing the water for irrigation, reintroduction into the groud as percolation, and water retention ponds.

HOW IT WORKS

Flow Diagram

Incremental numbers show direction of water flow.

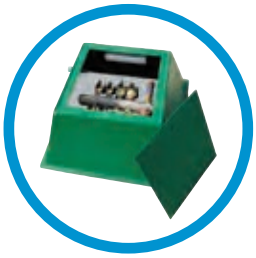

Manifold Enclosure Boxes

Manifold boxes are of all 1/8" Aluminum construction to NEMA 3R standards and feature overlapping doors with full height stainless steel hinges, 3-point latching 3/4" stainless steel handle with padlock hasp, and a #2 Corbin Russwin lock. These vandal resistant enclosures are ideal for housing Wall Mounted Manifolds and the DSC Controller above grade without the need for pump/controller rooms or burried vaults.

Wall Mounted Manifolds

Wall Manifolds are of all stainless steel construction and feature dual inlet connections with a removable plug, true union balancing valves, water hammer arrestor, hose bib, and pressure gauge. The solenoid valves are durable, easily maintained cast brass with a 24VAC UL recognized solenoid, and a DIN connector with a pre-wired 15 foot type SO cable. Use with DSC Controller.

Valve Boxes

Valve Boxes are of heavy-duty FRP construction with drafted sides for increased strength. FRP lids are strong, light weight, and do not create a heat hazard for small feet on hot days. All units have a wiring channel, a 2” conduit connection, and stainless steel tamper-resistant fasteners. Use with DSC Pedestal Mounted Controller.

In-Ground Manifolds

In-Ground Manifolds are of all stainless steel construction and feature true union balancing valves, water hammer arrestor, hose bib, and pressure gauge. The solenoid valves are durable, easily maintained cast brass with a 24VAC UL recognized solenoid, and a DIN connector with a pre-wired 15 foot type SO cable.

Drains

The Water Odyssey Plain Drain and Decorative Drains are cost-effective and ease maintenance. They feature a formed polyethylene sump, a molded polyurethane strainer basket, and a heavy-duty, ADA compliant grate with two quarter turn captive lock screws for quick maintenance. Drains with decorative designs are also available.

NOTE: Equipment may vary from project to project based on the needs of the design.

DSC Series

Dynamic Sequencing Controller

Designed specifically for Aquatic Playgrounds, the DSC is the only controller in the aquatic play industry that has wireless capabilities, and is available as an ETL (UL 1563) listed controller for swimming pool applications.

Features:

1. Accepts Wireless and Hard-wired signals.
2. UL 508A Listed Control Panel. *Available in ETL (UL 1563) for swimming pool applications.
3. Every project controller is supplied with a program for the specific project.
4. SD Card slot for Play Scenario backup.
5. Compact NEMA4X housing .
6. Easy to program or make operating hour changes in the field through the keypad interface. Upload play scenario directly to the Controller Module with an SD Card.
7. “Polarized connectors” – terminal blocks - make wiring easy and quick – specialized installation tools supplied.
8. Write original dynamic programs (not just select from pre-programmed packages).
9. Output displays – indicator lights show activated outputs
10. Control module may be used remotely, e.g., adjacent to play area while making program adjustments using CAT5 cross-over extension cable.

Features:

Manages Hours of Park Operation
Controls Play Scenario™
Manages Water Usage

* (ETL Listed for Swimming Pool application -1. UL Standard for Safety for Electric Spas, Equipment Assemblies, and Associated Equipment, UL 1563, Fifth Edition, Dated March 8, 2004, containing revisions through and including February 10, 2006. 2. Canadian National Standard for Spas, Hot Tubs, and Associated Equipment, CAN/CSA C22.2 No. 218.1-M89, First Edition, including April 2006 updates.)

Pedestal Mounted DSC

Designed for outdoor use, this corrosion-resistant assembly features a heavy-duty FRP base with a NEMA-4X stainless steel, lockable enclosure. An ideal solution when a secure panel mounting area is not available. For use with valve boxes and in-ground manifolds.

Single Timer Controller

An economic solution for aquatic play

The Single Timer Controller is ideal for small spray parks & unsupervised facilities. Easy to operate, this ETL/UL listed controller is 7 day/ 24 hour programmable with fine-tuning adjustment of 1 second up to 24 hours. This unit is designed to control multiple water features with a wired activator and a brass solenoid valve to supply water up to 100 gallons per minute for the specified time duration. The Single Timer Controller is perfect for when you need a simple, low cost, low maintenance solution for aquatic play! Contact your local Water Odyssey representative for more information.

TYPICAL ACTIVATION

Water Odyssey innovation has developed wireless activation to reduce maintenance and installation costs while providing greater flexibility in design. Water Odyssey activators are FCC registered and labeled. (Also available in hard wired versions.)

Touch & Go™

The Touch & Go activation bollard is durable, reliable, low voltage and available in all standard colors. Available in wireless and wired versions.

Launch Pad™

The low profile of the Launch Pad makes it unique in the industry. It is durable, reliable, low voltage, and may be deck or wall mounted. Available in wireless and wired versions.

SPECIAL APPLICATIONS

Sound Stick™

The Sound Stick™ is used to both activate play components and to provide sound. This feature can be used to initiate game play, give game instructions, and to announce game scores. All Sound Sticks™ are available with custom themes created by our in-house artists.

Motion Pole™

This unique activator incorporates motion detectors to sense the presence of children and to initiate the Play Scenario™ of the aquatic playground. Units are available with up to three sensors. Low voltage. (Hard wired only).

MECHANICAL VALVES

Roto Flow Bollard™

The Roto Flow Bollard™ is a remotely mounted unit that allows children to operate an aquatic play component from a distance. Unit will handle up to 30 GPM.

Roto Flow Valve™

The Roto Flow Valve™ is a remotely mounted unit that allows children to operate an aquatic play component from a distance. Unit will handle up to 250 GPM.

FINISH, COLORS & THEMING

COLOR CHOICES

AQUA ARMOR™

- The Toughest Coating in the Industry!
- Vandal-Resistant!!
- Bright Long-lasting Color!!!

Water Odyssey's Aqua Armor™ is the best and most durable coating system available in the industry today. It is applied in a five step carefully controlled process that ensures a durable, fade-resistant finish that is far superior to polyester powder coat systems. Unlike powder coating, Aqua Armor is field repairable to factory standards.

LUSTERCOAT™

LusterCoat™ is a Metallic finish incorporating Aqua Armor. Now you can have the metallic look a metal surface without the high maintenance of constant cleaning.

LUSTERBLAST™

A proprietary Water Odyssey three-stage finishing process that creates a lustrous, warm finish which requires minimal maintenance. It incorporates a passivation process which mitigates the potential spot corrosion associated with the 304 alloy.

COLORCAST™

ColorCast Polymer Accents and Panels are offered in a variety of colors. Lighter colors allow more light to pass through while darker colors offer bold statements and contrast. Color combinations create color mixing and cast colorful shadows on the ground. Some spray features create an educational experience in color theory when accents overlap.

SIMPLIFY THE COLOR SELECTION PROCESS.

CHOOSE A COLOR PALETTE AND LET WATER ODYSSEY DO THE REST.

CAPTURE THEIR IMAGINATIONS

CREATIVE THEMES

Limited only by the imagination, Water Odyssey theming keeps youthful hearts entertained by providing the creativity your aquatic playground needs. Our Water Odyssey design team offers new and exciting play features in a variety of themes from ocean life to forest creatures. We can also create custom designs based on your ideas and requests.

Whether a standard product or custom creation, Water Odyssey is able to develop “the look” for your specific project needs.

Theme Painting

Water Odyssey offers theme painting like no other. Here is an example of a Flush Mount ground spray feature that has been theme painted with a crab.

Custom Painting

Water Odyssey offers custom theme painting like the Tidal Barrel sponsored by Dr. Pepper® shown above. Custom theme painting includes logos, icons, mascots, and paint matching for color systems such as Pantone® and RAL®.

Theme Carving

Products with carved additions, like the Parrot on the Tidal Bucket shown above, are a great way to create a unique play experience.

DESIGN SUPPORT

Water Odyssey's design staff & network of representatives are available and prepared to assist you with the complimentary design support that you need to achieve a successful aquatic playground installation. From the selection and specification of equipment, to hydraulic design, Water Odyssey designers always consider play experience, safety, equipment placement, color themes, and budget when designing your aquatic playground.

Dedicated to helping you every step of the way

Our passion at Fountain People is to tell stories with water, light, sound, and motion. We are committed to bringing your creative vision to life. That is why we are driven to provide the highest quality water feature and aquatic play equipment to the industry. We support our clients through excellence, integrity, teamwork, innovation, and fun. We value the trust you place in us; therefore, we vow to stand by you from concept to completion and beyond.
